Rules

Show only what matters. Titles, important data, alerts, numbers and icons stay on screen. Sub-text (explanations, timings, counts, hashes, full addresses) is revealed on hover, focus or click.

Types are marks. What kind of thing something is shows as an icon, shape, colour or position, named on hover or click.

Fill the space. A row with room above and below its content gets bigger text or a bigger icon, not more padding.

Status is colour by default. Settings › Appearance › Status marks adds the shape, or the shape and the word. The word is always on hover and read by screen readers.

Keys live behind ? No key strips on screens; the ? list holds every key.

AI is a mark. The plum AI mark, its notice on hover.

Colour · Case Night

The newsroom after dark: navy, cream paper, an amber lamp.
